Organized Effort of Pass Retailers Must Be Made to Combat Boycotting Methods of C.I.O. Organizers

Merchants and their clerks in Crows Nest Pass towns have been subjected to a form of intimidation used by labor organizers quite frequently—threats of boycott or loss of business if they do not become members, or do not recognize the union. The C.I.O. organization which represents the miners of the Crows Nest Pass has signed up clerks to pay dues to their organization. It is the old tale of walking bosses trying to tell employers what they should do. True, these hired organizers manage to keep within the law, though they do in some cases use threats of boycott, as The Journal has experienced not only from the C.I.O. but the Red organization which in 1933 almost wrecked the coal industry of the Crows Nest Pass towns, and against which this paper, composed with a few stalwarts who would not submit to labor dictatorship, fought in those stormy days.

We want none of these tactics in Canada or the Crows Nest Pass, and merchants should make it clear that they will not submit themselves to this form of interference and intimidation. Let these organizers stick to their union, and not poke their trouble making noses into business which does not come under their purview.

Hours of labor for store clerks, and their wages are set forth by provincial statute. This organization would usurp the powers of government if it had enough rope. These tactics should be combated at every turn of the wheel, for dictatorship in any form cannot be tolerated.

Particular attention is drawn to a clause in a resolution passed at Sunday's meeting:

"That notice be forwarded to respective employers, informing them that unless they sanction recognition for employee union and allow union representatives the privilege of collective bargaining on or before the 10th day of October, 1941, that measures will be taken to suit the attitude of any one or more employers who deny the employees this privilege—the right to organize and collective bargaining."

This is a distinct threat to the employers, which includes storekeepers and small business firms doing business here. Are the merchants of the Pass towns to take this threat without a murmur, just because paid hirelings of a C.I.O. organization want to force us, a small scale One Big Union? Many will recall the collapse of similar efforts when this was tried in Winnipeg 20 years or more ago. The Journal can foresee that if the will of the C.I.O. organization

were imposed on merchants, they would find trouble makers telling them how they should run their business, who they should hire and the wages they should pay. In fact if the matter comes to a show down, these organizers will be told that they are entirely outside of the law and that they had better keep their efforts within their own field of labor.

On various occasions intimidation has been levelled at The Journal by Reds, Pinks and would be labor bosses because it would not be a party to their propaganda. The Press is as free as never before the subversive mouthpiece of any organization which aims to bend people to its will, whereby it will become the dominating power in their lives or in a community. Store owners, clerks, bar tenders and every wage earner have been intimidated into joining a union here which means nothing to them, for their hours of work are governed by provincial statute, for which they do not have to pay labor racketeers' dues. If they don't join they are threatened with boycott.

A letter is sent to the Dept. of Public Works re a pedestrian walk alongside Blainmore Road was filed.

A letter from the East Kootenay Power Co. re transporting of children was discussed. The decision of the board will be sent to the company at a later date.

A letter of resignation was received from Miss Edith Haysom. The secretary was authorized to send her a letter expressing the appreciation of the board for her work as teacher and its regret, at her not being able to continue teaching.

A letter will be sent to W. L. Krish acknowledging his letter to the board. The board will maintain the stand followed by the previous board requiring all pupils to salute the flag.

Mrs. John McDonald has been appointed substitute teacher until such time as a permanent teacher can be appointed to fill the vacancy created by the resignation of Miss Edith Haysom. Not more than \$40 will be allowed Home Economics teacher, Miss Megan Jones for transportation subject to the approval of the Blainmore Board. It was agreed to redecorate the residence of Principal Hoyle and also repair the kitchen floor. Accounts were presented and authorized paid.

LOCAL APPLE TREES BEAR FRUIT

Plums Are Also Grown Locally; Gardeners Proud of Their Achievements.

A few local gardeners have diverted their gardening activities to the raising of fruit. Last year Mr. Wm. Antrobus, who makes a hobby of fruit gardening, had several fine samples of fruit on display.

On Thursday last Mrs. J. Yates placed on display two apples on a small branch. The largest of the two measured two inches in diameter. The apples were of the Duchess variety. Mrs. Yates planted the fruit tree a few years ago at her home on Fifth Street and this is the first year it has borne fruit.

Mr. Antrobus was successful in growing a full sized apple this year and has several plum trees bearing fruit. A plum tree was also grown in his garden on Fourth Street which bore fruit.

ST. PAUL'S UNITED CHURCH ISSUE BOOKLET

An 8-page mimeograph booklet to be known as the St. Paul's Church News and is being issued for the first time. Its editor is Mr. Percy Dickson, and assistant is W. L. Rippon and Rev. J. E. Kirk.

The booklet gives news regarding the church. Activities of the Board, Ladies' Aid, finances, services, and other new items are given.

Constructive criticism is asked by the editors in order to improve the booklet. It will be issued once monthly.

HARRY CLARK AND WM. MILLEY GIVEN PRESENTATION

Given Westminster Chime Clocks; International Officials And Employees Present.

On Saturday, September 24, a number of officials and other workers of International mine, met in the I.O.O.F. hall to honor H. W. Clark and Wm. Milley on the occasion of their recent marriages.

The guests-of-honor were presented with handsome Westminster Chime clocks by A. F. Short and J. J. McIntyre on behalf of the workers. Following appropriate words of thanks by the recipients the gathering spent an enjoyable social evening.

Miss E. Haysom Resigns From School Staff

Ask Dept. Public Works For Sidewalk On Blainmore Road; Accounts Passed.

Regular meeting of the school board was held on Thursday, October 2, Present Chairman Evans, Trustees Stigler, Janostak.

A letter received from the Dept. of Public Works re a pedestrian walk alongside Blainmore Road was filed.

A letter from the East Kootenay Power Co. re transporting of children was discussed. The decision of the board will be sent to the company at a later date.

A letter of resignation was received from Miss Edith Haysom. The secretary was authorized to send her a letter expressing the appreciation of the board for her work as teacher and its regret, at her not being able to continue teaching.

A letter will be sent to W. L. Krish acknowledging his letter to the board. The board will maintain the stand followed by the previous board requiring all pupils to salute the flag.

Mrs. John McDonald has been appointed substitute teacher until such time as a permanent teacher can be appointed to fill the vacancy created by the resignation of Miss Edith Haysom. Not more than \$40 will be allowed Home Economics teacher, Miss Megan Jones for transportation subject to the approval of the Blainmore Board. It was agreed to redecorate the residence of Principal Hoyle and also repair the kitchen floor. Accounts were presented and authorized paid.

SCHOOL BOARD ASKS FOR FOOTPATH ON BLAINMORE ROAD

The local school board has asked the Department of Public Works to build a footpath alongside the main highway on Blainmore Road. The argument put forth by the Board is that pedestrians are in danger of injury by cars, etc., when walking on icy and slippery roads during the winter.

E. D. Robertson, Superintendent of Maintenance, stated that he is making investigation and will advise when he has received a report from his district engineer.

THEATRE NOTES

The all technicolor musical "Down Argentine Way" starring Don Ameche, Betty Grable and Carmen Miranda is the feature attraction at the Palace this weekend. Hear the latest rhythmic tunes of Latin America with Ameche and Grable at their best.

Three big stars are featured in the mid-week attraction "Thrill of Pago-Pago." This is a "soulful" story of pearl divers and adventure, coupled with the scenic beauty of the south seas.

At Cole's theatre, Bellevue, the screen's two top-ranking singing stars are together in their first all-technicolor feature, "Bitter Sweet." Superb acting and beautiful singing make this picture one of their best.

Raymond Destobél has enlisted with the R.C.A.F. at Calgary.

ANNUAL RED CROSS MEETING TO BE HELD ON MONDAY

Expect Representatives From All Local Organizations; Election of Officers.

The annual meeting of Coleman branch of the Canadian Red Cross will be held on Monday at 8 p.m. in the council chamber. Reports from the chairman of the various committees will be given covering the past year. President Wilfrid Dutil will give his report showing the increased activity of the branch and the large volume of work it has accomplished.

Election of officers will take place and it is the hope of present officers that every local organization will see fit to be represented by one or more representatives.

War Savings to Begin Activities on Oct. 14

\$2,180 War Savings Purchased Here In August; Meeting Will Decide What Article of Munitions Will Be Bought.

On Tuesday following Thanksgiving Day along with all other points in Alberta, with the exception of Calgary, who started October 6, Coleman will commence activities to purchase some designated war weapon each month through the purchase of War Savings Certificates and Stamps.

The objective has not yet been set, but a meeting to be held Friday, October 10, in the council chamber at 7.30 p.m., will decide this matter. This meeting is open to the public.

During the month of August \$2,180.00 worth of War Savings Certificates were sold in Coleman, \$1,540.00 through the Employer-Employee Plan, \$260.00 by Bank Pledges and \$380.00 by honour pledges and casual purchases.

War Savings have so far made a substantial contribution to the war effort, but increased savings are required to meet the demands of progressive expansion in the war effort, and the chief means to this end is curtailing consumption, which is a threat to the war effort if it is not curtailed, and to invest the money so saved in War Savings.

This is aptly summed up in the War Savings Committee's new slogan "SPEND LESS TO BUY MORE WAR SAVINGS CERTIFICATES."

LADIES' AUXILIARY PREPARE OVERSEAS PARCELS

Ladies' Auxiliary of the Canadian Legion met at the home of president, Mrs. R. Lloyd, on Tuesday and made ready 42 Christmas parcels for the boys overseas. There are at present 37 men overseas, but the extra parcels were made ready in case more local men reach the other side before Christmas.

LIONS DANCE MUCH ENJOYED

The Coleman Lions' dance at Turtle Mountain Playground on Friday was very well attended and much enjoyed. Members of Cardston, Lethbridge and Macleod clubs were present. The Lethbridge Lions Quartet were unable to make their scheduled appearance. Thirty of Macleod club attended.

CIGARETTE FUND NOTES

Dear Sirs: Received cigarette sent from Montreal on July 31, arriving here on August 22. Thanks very much as they are certainly appreciated over here. All are fine.—Pte. Roy Foster.

ST. ALBAN'S CHURCH, COLEMAN

Rev. J. R. Hage, A. Th. Incumbent Services: Sunday, October 12 2 p.m.—Sunday School. 7 p.m.—Evensong and sermon.

St. Paul's United Church, Coleman Thanksgiving Sunday, October 13 Minister: Rev. J. E. Kirk, B.A., B.D.

11 a.m.—Morning worship, "Causes for Gratitude." Special music by the choir. 12.15 p.m.—Sunday school. 7 p.m.—Song service and evening worship with special instrumental and vocal numbers by the boys, Clayton Rose, Gordon Roper and Billie Cousins.

We invite you to worship with us at these Thanksgiving Services

Boycott Threatened By Union Organizers of Pass Retailers; Meeting Held Here on Sunday

Would Compel Independent Retailers and Small Business Firms to Recognize C.I.O.

A meeting of workers was held here on Sunday evening. Enoch Williams, of Blainmore, was chairman, speakers being W. Ennis, of Blainmore, and M. Stigler and T. McCloy. Purpose of the meeting was to discuss unionism in the Pass and its recognition by employers, and to protest against the alleged injustice to industrially disabled men by the Workmen's Compensation Board.

Chairman Williams said that during the past two years the U.M.W.A. has encouraged and fostered the unionism of all branches of labor in the Pass and they hoped to carry the job through to a successful conclusion.

E. O. Duke, M.L.A., who had been scheduled to speak, was out of the district on Sunday.

W. Ennis gave a brief report of his attendance at the Dominion C.I.O. convention held at Hamilton last month. He spoke on the labor disputes at the Campbell Soup Co. plant, the McKinnon strike and the Goodyear Tire & Rubber Co. strike. T. McCloy, U.M.W.A. organizer, spoke on his activities to get union recognition for chambermaids, bartenders, lumbermen, etc. Several classes of labor refused to negotiate and he stated it was time for a showdown.

Two resolutions were then read and endorsed by the meeting. They read:

BE IT RESOLVED: That the Federal government enact permanent legislation as a substitute for the present unsatisfactory statutes and orders-in-council, covering the right to organize, collective bargaining, and protection against discrimination, and that such permanent legislation be enacted on the following basis: as affirmed by the Executive Council of Congress. (a) That the right to organize be firmly established and that an Enforcement Board be set-up, with power to levy penalties to employers for violation of such legislation. (b) That union recognition, collective bargaining and the signing of wage contracts, where unions have a majority, be made compulsory upon private employers and in government owned or operated establishments, plants, industries, guaranteed by appropriate penalties. (c) That arbitration in war-industries be made optional for the workers. (d) That union shop and check-off be secured. (e) That the right of workers to strike, after following established processes of negotiation and conciliation, be not interfered with but secured as a charter right for the workers.

The second resolution is addressed to employers of labor in the Pass.

We, the people of the Crows Nest Pass district representing all classes of labor assembled at this meeting in the Community hall, Coleman, Alberta, Sunday, October 5, 1941, contend to the employees, carpenters and carpenter's helpers, bush and mill men, that whereas, the governments of the province and Dominion of Canada have granted all workers "the right to organize and collective bargaining" and that whereas the miners who are the mainstay of each community in the Crows Nest Pass district, and are themselves organized one hundred per cent, feel that it is only right and proper that all the newly organized local unions of the Canadian Congress of Labor should have recognition from their respective employers, and privilege of collective bargaining.

Inasmuch as the workers of the different categories will be able to contribute their share in the march forward for maintaining and advancing the principles of democracy. Therefore be it resolved: That notice be forwarded to the respective employers, informing them that unless they sanction recognition for employees union and allow union representatives the privilege of collective bargaining on or before the 10th day of October, 1941, that measures will be taken to suit the attitude of any one or more employers who deny the employees this privilege, the right to organize and collective bargaining.

Be it further resolved that action taken on behalf of different unions will have the full support of the miners of this district.

The second half of the meeting dealt with the Alberta Workmen's Compensation Board. Wm. White, of Coleman, was chairman. Men, disabled in the mines, were brought up on the stage and a history of their case read to the meeting. Enoch Williams was the chief speaker and he stated that similar men would be held throughout District 18, of the U.M.W.A., with disabled men suffering from the injustices of the Compensation Board. He hoped ultimately to get a number of industrially disabled men on the floor of the provincial house to show all M.L.A.'s the injustices committed by the Board.

A resolution was endorsed regarding the Workmen's Compensation Board. It read:

At a mass meeting of miners and general public in the community hall, Coleman, October 5, 1941, at which some old standing cases of compensation were viewed and speakers were heard on the value of the Alberta Compensation Board. In particular the functions of the Chairman of the Board, Dr. W. V. Wright, who it was felt had created so much dissatisfaction with injured workers and representatives who have to meet him to discuss merits of compensation cases.

In consequence of this dissatisfaction, the following resolution was unanimously endorsed:

That whereas the Alberta Compensation Board was instituted for the specific purpose of caring for unfortunate workers who met with an accident in the performance of their daily occupation. We find that in the authority administered by the chairman of the Compensation Board, that many injured workers are abused and neglected, and in many cases men are forced back to work long before they are in a fit condition to do so. These instructions on the part of Dr. Wright have been so obvious and consistent that we, the workers of the Crows Nest Pass District, feel that we cannot endure his administration over Alberta compensation any longer. Therefore we demand that he resign his position as chairman of the Board, and further request that he have nothing to do with the administration whatever.

Further, that copies of the resolution be forwarded to Premier Albertart, the district office of the U.M.W.A. and every local union in District 18, and to E. O. Duke, M.L.A.

Ernest Gale Died Suddenly on Sunday

Had Operated White Lunch Cafe; Former Employee at Sentinel Power Plant.

The death occurred at Coleman hospital on Sunday evening of Ernest Gale, aged 64. Deceased, with his daughter, had been operating a restaurant business in Coleman during the past year and a half.

Born at Leamington, England, he came to Toronto at the age of nine years with his parents. During the past forty years he had resided in Alberta, for many years being located at Lacombe. An engineer by profession he took up residence at Blainmore, where he was employed for a considerable time. He later joined the staff at Sentinel Power plant as an engineer and was in the company's employ for a few years. He was then two years ago he bought the White Lunch restaurant and had operated the business up to his death.

Surviving are two daughters and two sons. The funeral will probably be held, this afternoon, from his son, Albert's, home at Blainmore. Death of Mr. Gale came as a complete surprise to his fellow citizens as he had been seen regularly at his place of business. Many were unaware of his death until several days later.

Mrs. Gilbert Hoyle was hostess at a miscellaneous shower on Monday evening in honor of Mrs. Sam Radford, (nee Carrie Sapeta). Cards were received, prize winners being Mrs. E. Ryppien, Mrs. S. Radford and Mrs. M. Bida. The guessing contest was won by Mrs. J. Pytlarczyk. The guest-of-honor was the recipient of many beautiful gifts.

Provincial Legion President Addresses Pass Meeting

Visited Coleman and Praised Club Rooms; Local Club Heads Provincial Clubs In Sending Cigarettes to Soldiers.

Carl Heckbert, of Vermilion, president of the provincial command of the Canadian Legion, accompanied by Ralph Henderson, vice-president of Calgary branch and 1st vice-president of the provincial command, addressed a meeting of all Pass Legion members in Sathoria hall on Sunday.

He reviewed the work of the Canadian Legion's services overseas and what it hoped to accomplish. He urged upon his listeners the importance of increasing each individual club's membership and advised them to welcome the soldiers of the present war into their ranks.

A Dominion meeting of the Legion will be held at Ottawa on October 18 for the purpose of urging upon the government the necessity of an all out effort in man-power and wealth.

They visited the local club rooms on Sunday and paid tribute to the local members on their comfortable quarters. The pictures which adorn the walls came in for special praise.

High tribute was paid by the provincial leader when he stated that Coleman was far in front of other provincial clubs in sending cigarettes to overseas soldiers. Approximately 10,000 cigarettes monthly are going to Coleman men in Britain. Other clubs send cigarettes only once in a while.

Another Enemy

With King Winter on the threshold and the season of greatest fire hazards approaching now is the time to give serious thought to the evil consequences of carelessness in the handling of one of the most beneficial and at the same time one of the most dangerous of the elements essential to civilized life.

It requires very little reflection to appreciate the beneficence which fire has bestowed upon mankind and there is no necessity here to enumerate its advantages or to speculate upon what civilization would be without it. But there is good cause to reflect upon the evils which it can, and unfortunately, too often does, bring in its train due to human frailty in the form of ignorance or negligence.

Every year millions of dollars go up in smoke to the great godfire, on this continent. Last year, property having an estimated value of \$300,000,000 was destroyed by uncontrolled fire in the United States. Proportionately the property loss in Canada from the same cause was comparable and Western Canada contributed her share to this unnecessary sacrifice.

It would be bad enough if only property were immolated on this sacrificial altar, but it does not end here. Valuable lives are being lost every year as carelessness with fire takes toll of human as well as material resources.

The term "unnecessary sacrifice" has been used in reviewing these losses. That the phrase is justifiable is readily demonstrated when one analyses the figures released by government agencies and takes note of the causes responsible for this terrible waste.

The Big Five

Public enemy No. 1 in the prairie provinces in 1940 was carelessness in handling smoking materials—tobacco, cigarettes and cigars and for a number of years the careless smoker has headed the list as the responsible agent for heaviest fire loss in the Canadian west. Defective stoves and furnaces rank next in the black list, while playing with matches, overheated chimneys and pipes and careless handling of petroleum products follow in sequence of their evil import.

One has only to scan the list of the big five to discern that there is amply warrant for declaring that carelessness and ignorance are the root cause of this needless waste and sacrifice and to state unhesitatingly that practically all of it could have been avoided with the exercise of a little commonsense, care and forethought.

While the careless smoker is a menace the year round, and possibly this is the reason that he heads the list, some of the other hazards listed as primary causes of uncontrolled fire are amplified many fold during the winter season just at hand, and especially is this true of defective stoves and furnaces and overheated chimneys and pipes. Possibly the careless handling of petroleum products may be listed as an acute winter hazard when one remembers how often, far too often, a sluggish fire in the kitchen stove is prodded into action by a dash of coal oil and even the still more dangerous gasoline.

Because of these increased dangers during the winter months now is the time for the occupant of every farm and every home in hamlet, village and town to check over furnaces, stoves and pipes, repair all defects and to make a solemn resolution to eschew the use of coal oil or gasoline to speed up a recalcitrant fire.

More Important In War

These are important precautions to take not only in winter but throughout the year. They are important measures in peace time, but in war time their importance is multiplied many times over. At a time when the nation is conserving, and must conserve, all its assets in manpower and materials to wage a desperate war against the forces of evil, every life lost by fire, every dollar that goes up in smoke is an aid to the brutal Hitler and his Nazi hordes. Let it not be forgotten that loss of life and property are of tangible assistance to the enemy.

For this reason, if for no other, efforts to prevent loss by fire should be redoubled and no stone should be left unturned to make loss from this cause impossible. As already indicated, the risk is much greater during the next few months than in the summer and is greater while we are at war than in times of peace, even after discounting sabotage possibilities.

In the small towns and villages, much of the fire fighting equipment is manned by voluntary forces. Enlistments in the army, the navy and the air force have necessarily impaired the experienced personnel available to quench a conflagration. Hence, because of the war, danger from fire has been increased and it behooves those who have not fared forth in uniform to take every precaution to prevent a fire breaking out and to be prepared to adequately cope with fire if someone is careless enough to let it break out.

Once a year integrity of coins; "You were always a fault-finder," turned out of the Ottawa mint is growled the wife. Checked by three assay commission—"Yes, dear," responded the husband, meekly; "I found you."

**I'VE STOPPED TAKING PILLS
AND POWDERS... I'M SOLD
ON ALL-BRAN!**

"I have used all kinds of pills and powders, but nearly everything gave me a great deal of discomfort. I have been eating KELLOGG'S ALL-BRAN now for about five months, and it has done me so much good! I will never be without ALL-BRAN in the house," writes Mrs. E. Goodale, Hamilton, Ontario. Try All-Bran's "Better Way" to correct constipation due to lack of the right kind of "bulk" in your diet. But remember, ALL-BRAN doesn't work like cathartics. It takes and it has done me so much good! Get ALL-BRAN at your grocer's, in two convenient size packages, or ask for the individual serving package at the restaurants. Made by Kellogg's in London, Canada.

Plans For Post-War Emigration

Very Heavy Influx From Britain To Canada Is Foreseen

Officials of the British Dominions Emigration Society announce that they are already laying plans for a mass wave of emigration from Britain to Canada immediately after the war.

Founded some 60 years ago as a philanthropic organization, the first purpose of the British Dominions Emigration Society was to assist settlers in Canada to reunite with their families. Though its activities have necessarily had to be suspended since the outbreak of war, it is fully expected that larger numbers than ever before will apply for passage assistance immediately after the cessation of hostilities.

It is realized that one of Canada's immediate needs after the war will be immigration from the British Isles. Many adventurous spirits will first strike out alone, leaving their families temporarily in Britain, and the Emigration Society expects many calls to be made upon it to assist wives and children join their husbands and fathers. This is the particular purpose for which the organization was originally founded and the Society is now laying its plans to see that that necessary assistance will be forthcoming in as many cases as possible.

Apart from the various privations and dangers that were faced by the settlers of two and three generations ago, one of their major difficulties was to establish themselves, build their new homes, support their families in England and, at the same time, save sufficient money to bring their families to the new land. The British Dominions Emigration Society was formed by a group of charitably minded citizens to assist in the reunion of these families by advancing loans without interest charges. More than 40,000 families have been assisted, and hundreds of thousands of people now in Canada owe their presence to the work of this organization. Its activities have stirred the warm commendation of many British and Canadian Government officials and, most recently, for the continuance of its work and the promise of further assistance to future immigrants, the earnest congratulations of the Canadian Premier, the Rt. Hon. Mackenzie King.

The head office of the society is in London, England, and the Canadian manager is R. Gordon Burgoyne, whose office is located in Montreal.

Rather Important

Airman Had Good Reason For Wanting To Look Trim

The young airman came into the Y.M.C.A. at London's Waterloo station. It was early in the morning. He had just stepped off the train after an obvious long journey. His uniform was crumpled from his having slept in it. His face bore a worried look.

"Anything wrong?" asked the "Y" man in charge.

The airman nodded.

"I've an appointment this morning," he said mournfully, "and just look at this uniform."

"It's pretty bad," the "Y" man agreed.

"I suppose there's no place open this early where I can get a job of pressing done?"

There was no place, the other knew. He thought for a moment.

"No. But I think I may be able to borrow an iron. That be any good?"

The airman's face lit up.

"Could you really?" he asked incredulously.

The "Y" man could and did. Of course the airman's uniform and he retired, while the other plied the iron.

The job finished, the flyer donned the uniform and gazed admiringly at its smooth perfection. He shook his head in wonderment.

"Gee, thanks!" he said. "This is fine. I was awfully worried about the way I looked."

His voice grew confidential.

"You see, I've got to go to Buckingham palace this morning and a chap likes to look his best when he's being given a medal by the King. Thanks awfully."

Ban On Swiss Trade

Britain Can No Longer Continue To Permit Passage Of Material

The British ministry of economic warfare announced Britain no longer could continue the limited facilities which heretofore have accorded passage of material for Switzerland's industry through the sea blockade and across enemy territory.

A statement said the action was taken because of the terms of a recent commercial agreement between Switzerland and Germany.

It said the British government appreciated the difficulties of the position of Switzerland, a land-locked neutral, and would continue to give facilities within limits for imports for foodstuffs and other goods for strictly domestic consumption.

No automobiles are allowed on Mackinac Island, Michigan. 2432

New Radio Device

Test Machine For Detecting And Intercepting Enemy Aircraft

Guarded as a military secret, the United States army's new radio device for determining and intercepting enemy aircraft is completing its first comprehensive test.

Brig.-Gen. C. H. Wash, commander of the 2nd Interceptor Command of Seattle, explained its general method of operation.

"Instrument devices, operating without human attention, automatically feed to the stations behind the lines information on movement of aircraft which enables skilled operators on filter boards to plot their courses," he said.

"Automatic devices do not discriminate between friendly and hostile aircraft; filter board operators must do this in a few seconds from their knowledge of the position and movements of friendly airplanes. Hostile tracks are transmitted immediately to an officer who with the instruments—also secret—can determine almost instantaneously the time and place at which his own army's fighter craft can intercept the opponents. He forwards corresponding orders to fighter plane commands."

General Wash, who spent six weeks in Britain early this year as an aviation observer, said the equipment being tested now is American-made and is the first to receive a tryout in the U.S. under conditions simulating actual warfare.

Needs Victory Badly

Hitler Knows It Is Necessary To Boost German Morale

Hitler needs a resounding victory for home consumption, Major-Gen. F. C. Boumont-Nesbitt, attached to the British Purchasing Commission in Washington, said in an interview at the headquarters of the British Information Service, 30 Rockefeller Plaza.

"But he is not getting that victory," he added. "What he really needs is to give the German people a fillip before another winter sets in."

The morale of the German people is a definite factor in this war. That morale is very brittle. Do not misunderstand me. I do not say that the morale is breaking. It is a long way from that. But it is more vulnerable now than ever before."

Asked about the possibility of a British expeditionary force to Russia, the General said: "There is a possibility. That is my personal opinion. But there is the question of maintenance. That question is more vital than the question of men only."—New York Sun.

Using Glass-Like Plastic

Dentists are finding use for acrylic, the glass-like plastic which the Royal Air Force uses for the windows and gun turrets of its aircraft. Dr. E. H. Smith of the University of Pennsylvania told the Montreal Dental club that false teeth made from the substance look more natural because it is translucent.

Increase Should Be Slight

An increase in farm prices should not make a great increase in the cost of living for city consumers, according to W. E. Haskins, secretary of the Canadian Federation of Agriculture. On a general average 80 cents of a consumer's dollar is spent in profits, wholesale and retail expenses and only 20 cents reaches the farmer.

Freezing Cooked Foods

Already becoming accustomed to buying raw foods preserved by freezing, we are now told that soon we shall be able to buy whole cooked dinners in quick-frozen form. All the hostess need do is to thaw out such a dinner, heat it to the desired temperature, and serve.—The Rotarian.

Aluminum, nickel, and tin are among the elements that occur in the human body in small traces.

Gives Jumper Confidence

Invention Of Anti-Spin Parachute Has Been Announced

A new parachute which will prevent parachute troops from spinning dizzily through the air was announced in a symposium on aviation medicine at the University of Chicago's 50th anniversary celebration.

Dr. Andrew C. Ivy of Northwestern University, Chicago, and Dr. Anton J. Carlson of the University of Chicago, declared the new parachute with a small anti-spin "air anchor" has been found to give the jumper a feeling of confidence, particularly in delayed falls because he floats in an erect or partly-erect position and does not whirl.

Free Evenings

A man who had been courting a girl for ten years was asked why he didn't marry her.

"Well, I've been seeing her on Wednesday and Friday evenings every week for ten years," he said, "and if I married her I wouldn't have anywhere to go on those evenings."

South Africa's New Stamps

South Africa's new war issue of postage stamps are in eight issues depicting women's war activities, infantry, nursing services, air force, seaward defence, artillery, war production and mechanized units.

Man Power Debate May Change Course Of Production Program

London.—Neutral observers said the entire future course of the joint British-American war production program may be affected by a manpower debate to take place shortly in parliament.

These sources said production experts are wondering whether the United States can best help Britain by concentrating on sending her all the machinery she wants, or by keeping it at home and concentrating on manufacturing the bulk of war material there.

Key to the solution was said to be the uses to which Britain expects to put her manpower.

Political sources said that the government's case in statements by Prime Minister Churchill and Labor Minister Ernest Bevin probably would be secret so as not to divulge exact figures of production which would allow Germany to calculate the number of tanks and planes Britain is able to build.

The newly-arrived United States minister to London, John D. Biggers, who is in charge of synchronizing and co-ordinating British and American defence production, soon will make a quick trip to Washington to report recommendations to President Roosevelt. He is known to be studying carefully the availability of manpower to Britain's industries in view of the drains which have been made by the services.

One school of thought, led by Mr. Bevin, takes the view that the army has got to be fully manned and fully equipped with reserves to meet any contingency that may arise, and that the army has first call on any skilled men needed to man or to maintain aircraft or mechanized forces.

The other school is headed by Sir Walter Citrine, privy councillor, whose career has been in the labor movement where for years he has served as general secretary of the Trades Union Congress.

This school supports Sir Walter's contention that Britain does not possess manpower permitting "the biggest navy, biggest army and biggest air force" and that therefore she needs a "very highly-equipped army, a very substantial air force and of course a predominant navy."

"This," Sir Walter concludes, "can be secured only if we keep production at a maximum." He contends that the Allies must out-produce the Axis because material, rather than soldiers, win modern battles. He holds that production is impeded by over-mobilization.

Mr. Churchill so far has backed the army, flatly dismissing suggestions that skilled workers be released from the army to go back into industry by telling parliament Sept. 30 that he would not have the existing formations "pulled to pieces and gutted."

A point of concern to United States production experts is the indication that the supply of British labor is short.

Revolting Measures Used By Nazis In Occupied Countries

London.—Hangman and firing squad held sway in the writhing new Europe, as Germany stamped at an acknowledged "internal front" of revolt that stretched from Prague to Paris.

In former Czechoslovakia, in the angry remnants of Yugoslavia, in Greece, in France, and even in Bulgaria and Hungary, the story was the same, differing only as to scope and detail.

Admitting employment of the sternest possible measures, German sources asserted:

"With Germany herself deep in a fight for life it is understandable that we cannot tolerate an internal front against us."

But Czech sources in London suggested the blood bath in old Czechoslovakia had a far more sinister meaning than mere suppression of revolt. They said it was a deliberate process of extermination of all intellectual Czech elements liable to offer opposition, preparatory to mass transfer of heavy German industries to comparatively bomb-free sectors behind the Sudeten mountains.

Such of the particulars of the un-

Must Join Forces

United States-British Union To Ensure Peace Urged By Knox

Indianapolis.—U.S. secretary of the navy, Frank Knox, proposed that the United States and Britain join forces "for 100 years at least," to produce "by force if need be" an effective system of international law.

He told the convention of the American Bar Association that to preserve another world war the seven seas must be controlled for many years to come by the great "peace-minded, justice-loving" powers—Britain and the United States—which are "lacking in any desire for selfish aggrandizement."

"To put it bluntly," he said, "we must join our force, our power, to that of Great Britain, another great peace-loving nation, to stop new aggression, which might lead to a world disturbance, at its beginning."

The United States must give up the "fatuous folly" that it will not fight unless invaded.

There will not be for many years a time when we may not have to fight—"let us determine that we will fight elsewhere than on our own soil; far better a distant war than one at home."

Praise For Workers

Lord Beaverbrook Pleased With Tank Production For Russia

London.—Lord Beaverbrook, minister of production, sent from Moscow a telegram of congratulation to all workers who took part in the "Tanks for Russia" week, which set a production record.

The message read: "Boys, oh boys, you've raised the roof and lifted the lid and beaten the band. Now let's show them we can do the same and better for a 'Tanks for Britain' week."

Undergoing Repairs

Three British Ships Being Overhauled In United States Navy Yards

Philadelphia.—The 9,400-ton British cruiser Manchester is at the Philadelphia yard for "general refit," it was announced by Rear Admiral A. E. Watson, commander of the yard. The navy department at Washington also announced that the British destroyer Firebrand and the British merchant cruiser California were at Boston undergoing repairs.

For Scrap Metal

London.—The historic metal fences and gates surrounding Buckingham Palace are to be taken down to be converted into scrap for the manufacture of tanks and other weapons. The ministry of works and buildings said the King had approved the removal of about 20 tons of metal as a contribution toward a national campaign.

Indians More Prosperous

Good Fish Catch And Strong Fur Market Are Factors

Ottawa.—The 120,000 Indians of Canada, who have tasted the lean times of depression are enjoying a better measure of prosperity than for several years, Indian affairs department officials said.

Dr. H. W. McGill, director of the branch who has just returned from a western tour, said that among factors assisting the Indians' economic position was a good fish catch on the Pacific coast and the existing strong fur market with fair supplies of furbearing animals in territories where Indians hunt.

Information available to the branch indicated "several hundred" Indians have joined the fighting forces, following in the footsteps of tribesmen who gave good service in the Canadian army during the First Great War.

Speeding The Mail

To Establish Airgraph System Between Canada And Britain

Ottawa.—Postmaster General Mulock says arrangements are under way to institute an airgraph system between Canada and Great Britain.

The airgraph system is the scheme whereby the sender writes his message on a special form which is photographed on a miniature film. This is airmailed across to Britain where it is enlarged and delivered. The plan is for communications between Canadians and troops overseas, and is similar to the present scheme used between Britain and troops in the Near East. The rate would be 10 cents a word.

Lose Many Planes

Moscow.—German air squadrons, including the noted Condor legion, have lost more than 170 planes during attempts of the last two months to bomb Moscow. Col. A. Ilyin said in an article published by Pravda, the Communist party organ.

R.A.F. TRAINING OFFICIAL

Air Commodore A. C. Critchley, C.G.M., D.S.O., Canadian-born director of initial training for the Royal Air Force in England, arrived recently at Toronto on a tour of No. 1 Air Training Command.

Large Order Placed

Canada Will Soon Produce Fighter Planes Equipped With Engines

Toronto.—Canada's first fighter plane to be equipped with an engine before being sent overseas will shortly be in production here. The plane, manufactured by the De Havilland Aircraft Co., will be powered by a Rolls-Royce engine manufactured at the company's Detroit plant.

The new plane will be known as the "Mosquito," and a large order has been given the company.

Credit For War Purposes

London.—The House of Commons in committee agreed to a further supplementary vote of credit of \$4,450,000,000 for war purposes. This does not mean the money will be to bomb Moscow. Col. A. Ilyin said in an article published by Pravda, the Communists give the government the necessary power.

IN BRITAIN, W.A.A.F.'S GUARD BALLOONS

One of the very out-of-the-way jobs now being done by the W.A.A.F. of Britain is guarding balloons, a heavy job since the balloon ropes have to be hauled smoothly and evenly to give perfect anchorage.

CANADIAN BROTHERS PROUD OF FIGHTING NAZI "EGG-LAYER"

These boys are the envy of the rest of the Canadian troops in Britain. Through force of circumstances, most of the others haven't yet been in contact with the Nazis but the members of this anti-aircraft section in training in England have shot down a Nazi plane, and are they happy! These two are brothers, E. A. Underwood (left) and L. H. Underwood, who were landscape gardener and sawmill worker, respectively in Victoria, B.C., before they joined the army.

Pool Officials Endorse Four Point Policy For Western Farmers

A Strong Base

Vast Supplies Of Equipment And Materials At Iceland

Reykjavik, Iceland. A field force of the United States army—infantry, artillery, and engineer, signal, ordnance and medical units has arrived here with vast supplies of equipment and materials to make this one of the most formidable bases of the north.

The Americans brought with them commander, Maj.-Gen. Charles H. Bonesteel, called "some interesting equipment"—skis, snowshoes and Garand automatic rifles for every man—to take over camps built by the U.S. marines and British forces.

Maj.-Gen. H. O. Curtis, commander-in-chief of the British forces and general officer commanding the British troops on the islands, continues in command of all soldiers including the American contingent. (The arrival of American naval and marine forces in Iceland was announced on July 7, although American officers were seen there as early as mid-May. U.S. army air corps units also are on the islands. On Sept. 25, the arrival in Reykjavik of U.S. army nurses was disclosed.)

British Tommies off duty soon were in the best of terms with the Americans. These new troops appear to have supplies enough to ignore the rough Iceland winter.

The vast equipment should turn the bleak island into a Gibraltar of the north.

May Evacuate Nationals

Canadians Still Left In Japan Are Mostly Missionaries

Ottawa.—The department of external affairs, reflecting reports of deterioration in Japanese-British relations, has just revealed that Canada may very shortly evacuate more nationals from Japan.

Canadians still in Japan are mostly missionaries of both Catholic and Protestant faith.

Officials of the department say they hope to repatriate all who can be persuaded to leave aboard a vessel which Britain is understood to have dispatched to Nippon.

But on the surface there is no indication of a deterioration of Japanese-Canadian relations. Tokyo apparently accepted the trade rupture with the Dominion when Japanese credits were frozen.

Regardless Of Danger

London.—Seven hundred members of the Young Peoples Keep-Fit League petitioned the government to keep recreation centres open this winter regardless of the danger of night air bombings. "If we must die in an air raid," the petition said, "we prefer to die happily at a dance rather than perish miserably in a dugout."

Guest Children Like Canada

Edmonton. Nearly 50 per cent. of the British guest children in Canada have decided they want to spend the rest of their lives in the Dominion. Mrs. T. M. Snow of Ottawa, only English representative on the children's overseas reception board, said in an interview here.

Winnipeg.—Officials of the Manitoba, Saskatchewan and Alberta wheat pools, meeting here to consider the economic situation of western Canada wheat producers, endorsed a four-point program which they considered "absolutely necessary" to preserve the solvency of western Canada.

A statement issued outlined the four-point program which already has been submitted to the wheat committee of the federal government. The four points are:

1. That the initial payment by the Canadian wheat board be increased to \$1 a bushel, basis No. 1 Northern, Fort William. (The initial payment being paid to farmers on the 1941 crop is 70 cents a bushel.)

2. The stocks of wheat represented by the carryover as at June 31, 1941, be taken off the market and held as a national emergency war reserve. (The carryover of wheat at the end of July from the 1940-41 crop year was 480,000,000 bushels—an all-time record.)

3. That, as from Aug. 1, 1941, all sales of wheat be credited to the crop season 1941-42.

4. That the crop year 1941-42 be declared an emergency year under terms of the Prairie Farms Assistance Act, irrespective of market prices prevailing.

The statement said the pool officials are meeting to discuss the "alarming economic situation of wheat producers developing . . . through the low price of wheat, rapidly rising production costs, the smallest wheat crop since 1937, and very serious damage with losses in yield and grade through continued rains during the harvesting and threshing season."

In Saskatchewan, said the statement, meetings of farmers and business men have approved the four-point program suggested to Ottawa. Meetings of farmers and business men to discuss the question also were being planned in Manitoba and Alberta.

"A drop in prairie revenue in one year of more than \$140,000,000 on our main cash crop is not only a western disaster but a national calamity," J. H. Wesson of Regina, chairman of the central board of the pool organization, told officials attending the meeting.

"Increasing revenues from livestock products will give some relief in areas best adapted to mixed farming but will not begin to make up for a year failure wheat crop on reduced acreage for which the growers receive only about half the cost of production," said Wesson.

(Figures released by the Dominion bureau of statistics said farm income from wheat for the crop year ended July 31 totalled \$239,363,000.)

"Against this there is estimated wheat income from the current year's wheat crop of around \$85,000,000, a reduction of \$144,000,000," added Wesson.

(The Dominion bureau of statistics has estimated the western wheat crop this year at 286,000,000 bushels compared with the 1940 estimate of 325,000,000 bushels. Private predictions on the 1941 crop run as low as 275,000,000 bushels.)

Ottawa.—The current western drive for dollar wheat is gaining considerable headway and belief exists here that federal authorities may meet the demand considerably better than half way. The compromise figure most widely rumored on Capital Hill is 90 cents a bushel.

The official announcement is not expected before the return of Agriculture Minister J. G. Gardiner from the west as well as Trade Minister J. A. MacKinnon from his South American mission. MacKinnon, who now administers Canada Grain Act, is not due back in Ottawa before next month.

Meanwhile, the drive of the prairie pools to have the growers share in the price rise that virtually has affected every phase of Canadian economy except wheat is being carried on apace and there is plenty of evidence that it has caught the ear of the ministry.

Arrives In England

London.—Sir Lancelot Oliphant, former British ambassador to Belgium who was captured when the Germans overran that country in May, 1940, has arrived in England from Lisbon. He was one of several diplomats involved in a recent exchange of British and German prisoners.

Canada at War

Development of Canada's War Industries a Mighty Achievement—John Inglis Company Largest Producer of Automatic Guns in North America

Article Number Three
"WAR INDUSTRIES"
By B. M. F.

Anyone who inspected the Department of Munitions and Supply exhibit at the Canadian National Exhibition this year must have stood amazed at the marvelous display of implements of war shown there, all products of Canadian industrial enterprise and ingenuity.

They included the 25-pounder field artillery gun, the Bofors anti-aircraft gun, the Boys anti-tank gun, the Bren machine gun, the Universal carrier, bombs, rifles, shells, trench mortars, a complete engine for the Canadian-built corvette and a remarkable exhibit of Canadian-made bombs and fighter planes. Canadian factories are also turning out huge quantities of chemicals and explosives, depth charges and land mines, as well as motor torpedo boats, naval gun mountings, mine-sweepers and auxiliary craft.

It was for the purpose of giving Canadian editors a chance to learn the inside story of production of these war weapons that the Department of Munitions and Supply, headed by Hon. C. D. Howe, made it possible for them to visit a number of Eastern Canada war industries. In the short time available the editors saw sufficient to make them realize that Canada is responding nobly to the Churchill appeal: "Give us the tools and we will finish the job." Right across Eastern Canada a gigantic new arsenal has come into being, with scores of new factory buildings being added to Canada's industrial war plant, and old plants turning to war work. Spinning wheels, turning lathes and whirling machinery tell their own story. The Dominion Government alone has expended \$500 millions for new plants and materials, while total orders for munitions of all kinds now exceed two billion dollars. In terms of large-scale industry, this has happened almost overnight.

Until the fall of France, Canada was not looked to seriously for the tools of war. When Vichy capitulated, the picture changed abruptly. Canada's industrial and government leaders worked day and night to formulate the blueprint of the huge machine which in little more than one year has swung into action. A year, even six months hence, production will be on a scale not dreamed possible a few months ago.

Knowing little of this war program other than what they had read in their newspapers, fifty Canadian editors sallied forth late in August to find out for themselves. We saw only a few industries, eight to be exact, but they formed a highly-revealing cross-section. In Hamilton, for instance, a beehive of armament-making, we visited only one plant, the National Steel Car, largest shell-producing plant in the British Empire. Around the clock seven days a week thousands of shells for field artillery and anti-aircraft guns are pouring from the complicated machines which bore them, lengthen them, shape them, nose them and prepare them to receive fuses, loading caps and other parts.

Bren Machine Guns
At Toronto we visited the John Inglis Co. plant, producer of the famed Bren automatic machine gun, now one of the most prized weapons of the Canadian Army. Successful launching of Bren gun production constitutes one of the objectives of this war. The enterprise began at the outset of war under inauspicious circumstances, with the accusation of political corruption rife in the press. The result was a government investigation that failed at least to besmirch the character of the enterprising Major Hahn, chief promoter of the Bren gun program for Canada. We had the privilege of meeting Major Hahn, of hearing him speak for half an hour and of learning something about the man from acquaintances of long standing. We would judge that a majority of editors present on that occasion became convinced that there was a man who knew his business, who had the vision to make possible a vital link in our war machine and who was striving earnestly to do a job for his country. Incidentally Major Hahn served in Canada's armed forces in the Great War and according to contemporaries, he was a first-class soldier and an officer noted for his initiative and fearlessness.

Under his direction the Inglis Co. plant has become the largest producer of automatic guns in North America, if not in the world. Working far ahead of schedule it will have produced many, many thousands of Bren guns in 1941. The Canadian Bren gun enjoys a high reputation for efficiency and perfection of workmanship. It is in high favour with men of Canada's army. The plant and equipment used to produce the Bren gun was paid for jointly by the British and Canadian Governments and remains their property. It was designed and is operated by the Inglis Company. Thousands of hands are working on the material and assembly lines of the Bren gun. We noticed that a remarkably high percentage of the workers were girls or women. Indeed we found in nearly every war plant that female help was being utilized more and more. One official emphasized that in many operations the nimble fingers of young women were more suited to fast production.

Building Bombers
The editors had their first glimpse of how a bomber is made in an aircraft factory near Montreal. This particular plant is engaged in production of the Bolingbroke Bomber. It has been enlarged four times to take care of expanding orders. We saw bombers in all stages of production to the point where they were rolled from the factory for trial flight. We were given a demonstration of releasing bombs from the plane's belly that was highly significant. The entire plant, reverberated with activity as trained hands of men and women put together the huge bombers which will one day wreak vengeance over Hitlerland. It is difficult to imagine that Canada's aircraft industry was only in its embryo stage when war broke out, yet today we are manufacturing 13 different types of planes. The majority of primary trainers for the Commonwealth Air Training Plan have been delivered and the factories are giving more attention to advanced trainers and heavy bombers. In two years the personnel of the aircraft factories has increased from 1,600 to more than 25,000. The cost of an airplane staggers the imagination. A Hampden bomber, for instance, costs about \$150,000.

Tanks and Tank Guns
We visited another factory, which only a year ago was a peace-time industry but which is now producing tank and anti-tank guns for Canada's armoured forces at an astonishing rate. Fully-equipped with the most modern machinery, the great plant of United States origin, this plant typifies the revolution which has taken place in Canada's war industry. A third plant in the Montreal area was producing the new heavy infantry tank, designed to co-operate with infantry in assaults on enemy positions. Several of the completed tanks were driven in procession in front of the factory for benefit of our party. They made an imposing spectacle as the heavily-armoured and armoured vehicles moved up and down the street, their treads clanking on the pavement. A total of 800 of these tanks is now on order. The infantry tank is 17 feet long, carries a cannon and machine guns, as well as smoke bomb equipment. It is equipped with wireless set, periscope, telescope, telephone and other instruments. The crew are well protected by thick armour plate. A year ago these tanks were not considered within the realm of Canada's potentialities. Today they are a reality.

The 25-Pounder Gun
One of industry's most spectacular achievements was viewed by our party at the magnificent plant at Sorel where the new 25-pounder guns are coming off the assembly line. Here we met the Brothers Simard, Joseph and Edmond, small-town French-Canadian lads whose enterprises would make a story in themselves. Originally engaged in the ship-building industry, they had the foresight and initiative to launch a war undertaking of vital import to Canada. Overcoming tremendous obstacles, they have built a modern plant, equipped with precision machinery, that is turning scrap iron into the sleek and powerful 25-pounder gun.

Before the war the Simard brothers bought all the scrap iron they could find in America and transported it up the St. Lawrence to the spot where they planned to erect their plant. Today the great piles of scrap outside their building testify to the fact that they have an abundant supply for months to come. They brought skilled artisans from France to erect their mechanical operations. After the fall of France they lost these workmen. The Chrysler Corporation stepped into the breach. Today many hundreds of workmen, chiefly French Canadian, are performing the exacting tasks in the Simard plant.

The drama of war production is strikingly depicted in this factory, where massive, white-hot ingots are lifted from glowing furnaces to huge presses where the gun barrels are hammered and sealed to the right proportions, a spectacle that completely fascinates the visitor just as a blacksmith's anvil has an irresistible lure for the small boy. Another machine will cut up the red-hot ingot of gun-barrel steel as a knife would cut through cheese. The precision machinery for turning gun barrels, for fashioning gun carriages and the great multitude of intricate parts which go to make up a modern artillery gun, command the highest type of mechanical skill. Soon Canada's regiments of artillery will be equipped with the deadly 25-pounder, one of French Canada's contributions to the fight for freedom.

A visit to the Dominion Arsenal where small arms ammunition is made completed our tour of munitions plants in Ontario and Quebec. We had seen only a small sector of Canada's war industry, a lusty infant that is speedily acquiring the vigour of young manhood and will within a few months have reached maturity. Col. W. A. Harrison, executive assistant to the Minister of Munitions and Supply, who was a member of our party, told the editors that in addition Canada was producing twenty kinds of high explosives and as many as 400 motorized vehicles a day, as well as operating the largest small arms factory in the Empire. He said that when maximum output was reached they could equip a complete division every six weeks. Rifles, two-pounders and Tommy guns were among other equipment being produced in Canada. He declared that Canadians could make any kind of war equipment if given the plans and designs. The Department of Munitions and Supply personnel had grown from 200 to 2,000 since the war began. He admitted that the officers had experienced many heartaches that many bottlenecks had been encountered and that only now was the entire plan coming to fruition.

Unquestionably the armaments plan has cost Canada a colossal sum of money, even now running into astronomical figures. No doubt waste, inefficiency and extravagance have had a part in the story. But the main point is that the war industries are now swinging into production and that it is NOT "too late," as once we had good reason to fear.

(Next week's article will feature the R.C.A.F.)

barrels are hammered and sealed to the right proportions, a spectacle that completely fascinates the visitor just as a blacksmith's anvil has an irresistible lure for the small boy. Another machine will cut up the red-hot ingot of gun-barrel steel as a knife would cut through cheese. The precision machinery for turning gun barrels, for fashioning gun carriages and the great multitude of intricate parts which go to make up a modern artillery gun, command the highest type of mechanical skill. Soon Canada's regiments of artillery will be equipped with the deadly 25-pounder, one of French Canada's contributions to the fight for freedom.

THE COLEMAN JOURNAL

FIRST GROUP OF CANADIAN NURSES CHOSEN FOR SERVICE IN SOUTH AFRICA

Over one quarter of the group of 300 Canadian nurses requested by the South African Government for military nursing in that Dominion have now been recruited and are preparing to leave within the next few weeks for their destination.

Representing military districts from Halifax to Vancouver, these volunteers will wear the uniform of the nursing sisters of the Royal Canadian Army Medical Corps during their service overseas, but will wear the badges of South Africa and will receive rank and pay of that country. They are pledged to a minimum of one year's service abroad.

SECOND GROUP OF TRAINEES GO ON HOME DEFENCE DUTY

The second group of trainees under the four-month National Resources Mobilization plan has now completed training and personnel have been assigned to coastal defence, instructional and home war establishment posts. Seventeen hundred have been assigned to coast defence and 785 to other duties.

The sixth four-month class called for training the latter part of August numbered 3,716 men, there being 366 rejections on medical grounds from the 4,082 reporting.

Punch: "Some people have the idea that half their income is to go in taxes," says a writer. The optimists!

SAVE and LEND for VICTORY

Your Dollars Will Come Marching Home

Your pennies, your quarters, your dollars are needed in this war as much as the men at the front.

They are pledging their lives... will you not pledge your dollars?

Their lives may depend upon the planes, the bombs, the guns, the ships YOU help to supply.

Will you refuse to back them up?

Victory will come sooner if you save and lend to the limit. Will you shirk your part in shortening the war and hastening Victory?

Your dollars will come marching home when Victory is won, to bring security after the war.

Will YOU miss the thrill of having shared in the Victory, of having helped to build a sound Peace?

Mr. Jack Goldring is spending two weeks vacation at Edmonton and other points.

David Smith, R.C.A.F., at Summerside, P.E.I., is visiting his parents, Mr. and Mrs. O. Smith.

Miss Julia Ondrus, R.N., has been appointed to the staff of St. Michael's hospital, Lethbridge.

Prize winners at the Elks whist drive last Thursday were Mrs. S. B. Ryan, Mrs. S. Krzyz, T. Scovello and J. Smith.

Ladies' Aid of St. Paul's United church entertained the church choir at a supper-party in the church hall on Wednesday evening.

Born: To Mr. and Mrs. J. Dugdale, of Bellevue, on Sunday, September 28, at the home of Mrs. R. Vincent, a daughter, Margaret Agnes.

Mr. and Mrs. L. M. Lunn have returned to their home at Williams Lake, B.C., after a vacation spent here with Mrs. Lunn's parents, Mr. and Mrs. Joe Plante.

A surprise miscellaneous shower was held at the home of Mr. Ed. Milley in honor of Mrs. Roy Whitehouse, nee Margaret Milley. The guest-of-honor was presented with many useful and beautiful gifts for which she made appropriate thanks.

Dr. J. W. Summers, dentist, who is about to start a practice here, was in town on Monday. He has rented the offices in the Morrison Block formerly occupied by Dr. H. Campbell. He will open the offices on October 15. A Directory advt. in next week's issue will reveal the office hours.

A plate glass window in Antrobus' shoe store, valued at \$100, was smashed by a rock last week. It is thought that some youngsters playing in front of the store, caused the damage.

Ladies' Auxiliary of the Canadian Legion are sponsoring a Tea and Apron sale in the L.O.O.F. hall on October 11. A whist drive will be held in the evening. See advt.

Ernest Houghton is a patient in Banff hospital, receiving treatment under the Workmen's Compensation Board for an injury sustained several months ago during his work at McGillivray mine, when he fell while carrying a heavy shaft or casting. His back has been in a cast and likely will remain that way for some time. He expects to spend Thanksgiving Day at his home here and will return to hospital during the week.

Chinese Girls from Coleman Train For Service In Far East

(Calgary Herald)

Intending to return to China to do missionary work among their own people, two Chinese girls from Coleman, Alberta, have left Calgary to start a training course at the Salvation Army Training College in Toronto.

The girls are Grace and Dorothy Chow, daughters of a Chinese storekeeper at Coleman. The girls spent most of their life in Coleman except for a visit to China in 1932. They first came into contact with Salvation Army work when an official visited their home during an epidemic. He invited the family to attend church and Sunday school, and since that time the girls have been regular attendants. For the past two years the girls have been living in Calgary, working at the Sunset Home and the Eventide Home operated by the Army.

In their new course they will study social service work, the Bible, first aid in co-operation with the St. John Ambulance Association, and Salvation Army principles and practices. After graduation they will be on probation for a year, and will then receive their commissions as lieutenants.

Giving Workers The Truth

It came as a shock to the head of a great Canadian industry the other day to discover that his thousands of workers were firmly convinced that the Dominion government was paying them their cost-of-living bonus. He took prompt steps to lay the facts before the employees.

It happens that his company ranks among the first half dozen in Canada in the enlightenment of its labor relations policies. It has been magnificently generous in what it has done for its workers. The heads of the industry are on a "Jack" and "Bill" basis with their workers and the workers' families. Yet even in such an industry a grave misconception arose.

Industry has a great responsibility to keep its workers informed. They are entitled to the facts about taxes that industry is paying. The facts about the comparative earnings of employees today and before the war. The facts about the key importance of the company's products in the winning of the war. The facts about bottlenecks and what they mean when a few key men lay down their tools. The facts about the government's wartime labor-wages policy. The facts about the cost-of-living bonus. Facts about everything that concerns the worker.

We are fond of saying that Canadian workers are honest, intelligent, patriotic. They are. But they are also human, and that means they are easily swayed by an incorrect story when it is told to them by skilled demagogues and agitators. If industry will tell its story it has a better chance of holding labor's respect and understanding than if it does nothing.

Hon. Norman McArthur, the Minister of Labor, said the other day: "Employers should take their employees into their confidence, tell them what profits the company is earning, what it is paying in income taxes and excess profits taxes."

"Balance sheets, profit and loss accounts are cold and complicated and difficult to understand. In addition, they do not tell the story of the heavy taxation on profits exacted by the Canadian government necessary to meet our war expenditure. But this high taxation is a fact. Why should this fact not be fully revealed by industry to its employees?"

The advice is good. Many Canadian corporations are already doing what Mr. McArthur suggests. But more companies should follow the practice of recognizing employees as partners and giving the facts to offset irresponsible charges in respect to profits, salaries, etc.—The Financial Post.

Czechoslovak Military Mission to Visit Pass on Sunday

Mass Meeting of Czechoslovak People to be Held in Columbus Hall.

A meeting of the Czechoslovak National Alliance in the Crow's Nest Pass was held here on Sunday to make plans for the reception of the Czechoslovak Military Mission which is at the present time touring the Dominion and which will visit the Pass on Sunday, October 12.

The Alliance will sponsor a mass meeting of all Czechoslovak people in the Pass in the Columbus hall, Blairmore, at 2:30 p.m. Personnel of the Military Mission, each of whom will address the meeting, is Senator V. Benes, brother of Dr. E. Benes, president of the Czechoslovakian government in exile at London, Eng.; Col. C. Hutnik, high commander of the Czechoslovak army in England; Lt. Col. J. Ambrus, commander of the Czechoslovakian air force in England, and Colonel K. Buzek, secretary of the Czechoslovakian National Alliance in Canada.

Subjects to be dealt with by the speakers will be the Czechoslovakian Legion in England and its organization; general situation of the Czechoslovakian people throughout the world; prevailing conditions in Czechoslovakia under the Nazis; to encourage the Czechoslovakian youth in the Dominion to enlist in the Canadian Czechoslovak army.

It is the hope of the Pass Alliance that all Czechoslovak people residing in the Pass will attend this meeting.

ANNOUNCEMENT

Mr. and Mrs. Tom Higginbotham, of Coleman, wish to announce the engagement of their youngest daughter, Stella Blanche, to Mr. Robert Henry Olson, only son of Mrs. Henrietta Dixon, and the late Mr. William Dixon, of Calgary. The marriage will take place early in November in Calgary.

Intermediate Hockey Club Organizes

L. S. Richards New President; Ray Spillers, Secretary; Finances In Fair Shape.

A meeting of the local Intermediate hockey club was held in the Grand Union hotel on Sunday evening for the purpose of organizing for the coming season.

Officers elected: Honorary president, A. P. Short; president, L. S. Richards, vice-president, Ed. Leier; secretary, Ray Spillers; executive, Joe Lipovski, Jim Denholm, J. Atkinson, A. Murdoch; coach, Jimmy Joyce.

Club finances were found to be in fair shape after last season's operations.

A further meeting will be held to discuss the formation of a league between Coleman, Blairmore and Bellevue.

"Every full day's labor you do helps to shorten the struggle and brings us nearer victory. Every idle day lengthens the struggle and makes defeat more possible." — David Lloyd George.

Destiny is not a matter of chance, it is a matter of choice.—W. J. Bryan.

A free people must INVEST in its own FREEDOM

A Message

FROM THE WAR SAVINGS COMMITTEE, OTTAWA

The people of Canada are the most fortunate in the world.

Fortunate in the great sweep of space that is ours from ocean to ocean.

Fortunate in the vast yield and immense resources of our forests, fields and mines.

Fortunate, too, in our democratic institutions.

In a word, fortunate in our freedom.

This freedom is threatened today as it has never been threatened before.

The fall of the British Empire would mean complete dislocation of our unfettered way of life.

Everyone wants this way of life defended —this freedom saved—for our own future and for posterity. The response to every appeal for our defence has been magnificent—heartening to the whole Empire —alarming to Hitler.

But the need for weapons of war grows ever more urgent, as the Nazi threat spreads wider over the world.

The help of every Canadian is needed for Victory.

In these days of war the thoughtless, selfish spender is a traitor to our war effort.

A reduction in personal spending is now a vital necessity to relieve the pressure for goods, to enable more and more labour and materials to be diverted to winning the war. The all-out effort, which Canada must make, demands this self-denial of each of us.

Invest in War Savings Certificates the dollars you don't need to spend. After Victory, they come back to you with interest. Spend less NOW so that you can spend more THEN, when labour and materials will be available for the things you need. There is no price too high for freedom.

Three Simple Regular Methods of Saving

BANK PLEDGE PLAN—Convenient for business men and women, and others not on a payroll. Simply sign a War Savings Bank Pledge and give it to your bank. The bank will make monthly deductions from your account.

WAR SAVINGS STAMPS—A handy instalment plan. Stamp folders may be obtained from Post Offices, Banks and many retail outlets. 16 stamps will buy one \$4 Certificate, worth \$5 at maturity.

RURAL SAVINGS PLAN—Farmers receiving regular payments from marketing outlets can authorize regular deductions of any amount from their cheques. If delivering grain to an elevator, authorize it to issue a cash ticket in the largest possible multiple of \$4 in favor of The Receiver General of Canada, for the purchase of War Savings Certificates, to be registered in your name and mailed you direct.

SUPPORT THE WAR WEAPONS DRIVE IN YOUR COMMUNITY

Every town and city in Canada will soon conduct a War Weapons Drive. You will be asked to put all you've got behind the campaign in your community. Canada must provide more planes, more ships, more tanks, more guns, more shells. If you are already buying War Savings Certificates—raise your pledge. If you are not, get your dollars working for Victory.

SPEND LESS—TO BUY MORE WAR SAVINGS CERTIFICATES

Published by the War Savings Committee, Ottawa.

Had Spectacular Reign

Former Shah of Iran Was Vicious Man Of Action

Reza Shah Pahlavi is no longer Shah-in-Shah of Iran, having abdicated in favor of his 21-year-old son, Mohammed Reza Pahlavi. Thus, says the Hamilton Spectator, comes to an end a spectacular reign of 16 years, worthy to take its place in the annals of the Arabian Nights. The career of Reza Shah, and his rise to supreme power, is, indeed, well-nigh incredible. It is said he owes his good fortune to Lord Ronald, who picked out the tall Persian officer, who had given good evidence of his courage and enterprise, to take command during the anti-Bolshevik operations following the last Great War. Colonel Reza Khan, as he then was, lost no time in improving the occasion, riding into Teheran with his Cossacks, in 1921, and setting himself up as the new ruler of Persia.

That this vigorous man of action was a great improvement over the weak, pleasure-loving voluptuary Ahmed, his predecessor, who spent so much of his time in the French Riviera, is undoubted. The reforms Reza Khan effected in Persia, which he renamed Iran, were many and real. Conditions were so deplorable that there was practically unlimited scope for the exercise of his energy and zeal. But in bringing about the changes much hardship and injustice is said to have been inflicted on officials and people alike.

Complete Literature

Given To World By Ancient Greece, Modern France And England

There are few nations who have during their whole existence really thought and read. Among the Ancients the Latin literature is worth nothing at the outset, then it borrowed and became imitative. Among the moderns, German literature does not exist for nearly two centuries (1550-1750). Italian literature and Spanish literature end at the middle of the seventeenth century. Only ancient Greece, Modern France and England offer a grand and complete literature.

HOME SERVICE

LETTER MAY DECIDE FATE OF YOUR ROMANCE OR JOB

Her Note Needs A Few Tips

How quickly you can kill a summer romance with a boring letter. And yet good letters are as easy to write as bad ones.

Easier! For it's hard, dull work to grind out "Dear Bill, How are you?" I can write to you. But it's a cinch to say "You're gay, natural greeting, 'Hi, Bill'."

And why waste words "writing to say"? Just SAY! At once Bill recognizes the real, the attractive you he knows. He loves your characteristic description of the jobs that "wants to die but nobody'll let it," the "glorious purple sunset at Clear Lake."

It's the same in business letters. You don't hem and haw, "In reply to your letter..." You write directly: "The salary you mentioned will be satisfactory."

That positive note is important in closing, too. Not "Regretting the delay, we are—" but "We will see that such a delay does not occur again. Sincerely yours."

Our 32-page booklet tells how to make your letters vivid and correct. Has samples of 24 letters, formal, friendly, business. Helps improve your grammar, suggests topics to write about.

Send 15c in coins for your copy of "Good Letter-Writing Made Easy" by Anne Adams. Write plainly Size, Name, Address and Style Number, and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

- 197—"Advertising Design Self-Taught"
- 194—"Games and Stunts for Two or More."
- 193—"Fashion Drawing Made Easy"
- 191—"How to Make Your Own Rugs"
- 190—"Quick Course in Piano Playing"
- 189—"Simple Cartooning Self-Taught"

Bytown, now Ottawa, was the present capital of Canada, was founded in 1827.

CROWN BRAND SYRUP
NEW LONG-WAISTED HOME-FROCK
By Anne Adams

Of course you want to look young and well-groomed, even at household tasks. Your answer is Pattern 4777 by Anne Adams. It's so simple to make with the accompanying illustrated Sewing Instructions! That front-buttoning is a time saver for dressing and for laundering. Notice how the side sections of the bodice, front and back, are bias-cut for nice fit and to give you a slim long-waisted look. Notice, too, how the skirt flares gracefully below the hips! The long, panelled lines will give you height. As you can see in the small view, you may have long sleeves if desired. Get this useful pattern today and make it up in a cotton shantung or some other sturdy cotton.

Pattern 4777 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4 1/2 yards 3 1/2 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

Mahogany comes from the mahogany tree of tropical America.

SUNDAY SCHOOL LESSON

OCTOBER 12

CHRIST OUR SAVIOR

Golden text: For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have eternal life. John 3:16.

Lesson: Matthew 1:21; 20:25-28; Luke 19:1-10; John 3:16; 6:66-69; Acts 4:12; Romans 3:21-26; 8:31-39; II. Corinthians 5:14-21; Philippians 2:2-11; I. Timothy 1:15.

Devotional reading: Isaiah 63:1-6.

Explanations and Comments

The Savior Came to Give His Life a Ransom for Many, Matthew 20:25-28. Read the earlier verses of this chapter. Calling the disciples to him, Jesus reminded them that the rulers of the Gentiles played the tyrant over them, their great ones exercised authority over them. That is the worldly idea of greatness—power to exercise authority, high position which can demand service, enforce obedience, exact signs of homage. "Not so shall it be among you," Jesus continued; among you the passport to power is service; you are measured, not by the way you lord it over others, but by the way you serve others. Greatest among you is the one who is most useful to his fellow-men, even as the Son of man came not to be ministered unto, but to minister, and to give his life a ransom for many. This is the first mention of Christ's death as an atoning, sacrificial death for others.

Christ Came to Seek and Save the Lost, Luke 19:1-10. Zachaeus was a publican, a collector of taxes, who was rich, doubtless with ill-gotten gains.

When Jesus was about to pass through Jericho on his way up to Jerusalem, Zachaeus realized that his shortness of stature would prevent his seeing him over the heads of the crowd which was gathering. Being determined and resourceful, he ran ahead of the crowd and climbed a sycamore tree that was standing by the side of the road where Jesus must pass. The tree was easily climbed, for it had a short trunk and wide-spreading branches. The sycamore of Palestine is not like the sycamore of England; it has been described as a fig-mulberry because its fruit resembles the fig in appearance, and its leaves those of the mulberry.

When Jesus reached the tree he looked up and calling Zachaeus by name, bade him hasten down, for "I must abide at thy house," he added. No Jewish rabbi would have offered to stay at a publican's house, but Jesus' must was that of a shepherd who would care for his lost sheep. Zachaeus dropped down from his perch with great joy and hastened homeward with Jesus, while the people murmured saying, "He is gone to lodge with a man that is a sinner." "Publicans and sinners" was a phrase in common use.

"When Jesus declared that he had come to lay down his life a ransom for many, and in order that everyone might understand in what sense he ransomed men from their sin, he took the salvation of Zachaeus as an illustration, one understands the atonement" (John Watson).

An Incident In History

Nazi Successes Do Not Mean That Freedom Is Lost

Douglas Miller in the Atlantic Monthly says: Germany can be beaten. It is treason inside the country to say so, but every German thinks about it, worries about it, and is preparing himself psychologically to accept it. Germany will be beaten. The long story of humanity's rise toward a tolerable and free existence for average man will not come to an end because of the insane delusions of a single individual or the wounded inferiority complexes of a single people. German military successes in the last two years are based upon the superior mechanized army, organized and equipped while the Democracies slept. This is merely an incident in history. It is not the end of Christian civilization, or of human decency, or of freedom.

Should Be Permanent

One of our oldest and most time-honored customs, that of throwing rice and confetti on newly-married couples is being abolished by law in Britain. The shortage of foods and feeds, and of paper stocks, has forced the move. It is one war regulation which should not be hard to obey.

Specify picture name, address, picture or pictures requested—enclose success labels and mail to the St. Lawrence Starch Co., Limited, Port Greville, Ont.

DURHAM CORN STARCH

French Lads Loyal

Braved Dangers Of Chained To Join Forces In Britain

The New York Times says: No one in whom the spirit of adventure lives can fail to be stirred by the story of the five French lads, none of them more than 19 years old, who braved the dangers of the English Channel in two small canoes to join the Free French forces in Britain. For two nights and a day they battled the terrors and those who know the choppy seas of that waterway will appreciate what that means. In daytime they dared not hoist their tiny sails for fear of being seen from German patrol planes, but paddled stoutly on. Near land one craft struck a rock and sank, but the three boys in it swam safely to shore. In these five youths you have the true spirit of France. Two centuries ago it carried the indomitable Champlain by lake and river into the heart of the Canadian wilderness and gave the French an overseas empire. In the last war it drove back the Germans from the Marne and held them at Verdun. That spirit is not dead. It is only benumbed by great misfortune and held captive by the might of foreign arms and the treachery of self-seeking politicians.

Time Signals

International Service Still Functioning During The War

Also from war is an international service — time signals — affecting very home and office and equally important to learned scientist and untutored laborer.

Dominion observatory officials said daily international wireless time signals—one of them from Germany—are still being picked from the air to provide a scientific check on the clocks of Canada.

The signals are in conformity with international agreement and reports on their use are made to co-operating observatories. Ottawa receives daily time signals from Arlington, N.Y.; Bordeaux, France; Montevideo, Chile; Nauen, Germany; Rio de Janeiro, Brazil, and Rugby, England.

MICKIE SAYS—

"TH' BOSS SET, 'MY IDEA OF A REAL MAN IS A FELLER Y'KN SEND THE PAPER TO A YEAR OR SO, WHEN HE IS HARD UP, 'N WHO WILL COME IN LATER 'N PAY UP AND THANK YOU'."

For Prisoners Of War

Canadian Red Cross Sends 15,000 Parcels Weekly To Europe

Dr. F. W. Routley, national commissioner of the Canadian Red Cross, Toronto, said his organization is sending 15,000 parcels a week to continental Europe for prisoners in enemy occupied territory. The parcels, he said, cost \$1.90 apiece to put up and transportation expenses are \$2.50 each. They contain a week's supply of food, giving 2,300 calories a day.

Small In Comparison

Canada's cheese contrast with Great Britain asks for the shipment during the current production year of 50,000 long tons. This looks like a lot, until it is compared with the 160,000 long tons which New Zealand has agreed to ship.

Records show that 90 per cent. of automobile owners have in the past bought new cars once every 22 to 30 months.

The chief sources of cork are Spain and Portugal.

"MIDDLE-AGE" WOMEN (38-52 yrs. old)

HEED THIS ADVICE!!
If you have redness, NERVOUSNESS, suffer hot flashes, dizziness—caused by this period in a woman's life—try Lydia E. Pinkham's Vegetable Compound. Made especially for women. Hundreds of thousands remarkably helped. Follow label directions. Made in Canada.

There is one other U.S.A. in the world: The Union of South Africa.

DAUGHTER OF DESTINY

—BY—
Eleanor Atterbury Colton

CHAPTER XXVII.

For an instant that stretched time into infinity, Devona and Talbot faced each other across that handsome room. A clock ticked sonorously somewhere, Devona realized. And a muffled thudding that must be of her own heart pounded like distant kettle drums.

She waited, scarcely breathing, searching for the right word, the right gesture.

"Well," Talbot finally broke the spell himself with a quietness that she had, a few moments ago, mistaken for calm reasonableness. "Why did you come back? This isn't going to be pretty."

Devona moistened dry lips, tried to match that false calm with real control. "I had to come back."

"No you didn't. And you'd better run along now. Surely a man has a right to his lips twisted—his own decisions."

"No, not in this decision." She took a step toward him, flinched as she saw his fingers tighten around the gun's handle. "Not when it involves others."

"Fortunately, this decision doesn't involve any one but myself. Except," he added dryly, "as it relieves them of responsibilities."

"But it does, Tal. It involves all of us."

"All of whom?"

"Every one who loves you."

He shrugged. "Dale, maybe. But I'm a drag around his neck. He'll be better off. Otherwise, there's no one."

"Yes, there is. We all love you—I do, Tal." That reached him—almost. Instinctively she knew she'd touched him finally. "You mustn't do this—to me."

The taut fingers on the gun but relaxed a little. "Do you mean that, Devona?"

"But—of course, Tal." It was worth it, that little lie she assured herself watching him drop the gun slowly onto the desk. Besides, he wasn't exactly a lie. She did love him—for himself, for the traits he shared with his brother, for his need of her. Not the way she loved, had loved—Dale. Still—

"Devona—you mean—" Tal's grim face relaxed, almost imperceptibly at first, changed from despair to heart-breaking hopefulness.

Mute now with relief, Devona nodded, held out her arms to him. In the next moment he'd crossed the room to her, gathered her convulsively into his arms.

"Oh, my darling. Oh, my God, Devona. You don't know what this means. Devona, I love you. I've wanted you. I need you, my sweet."

The door, which had stood open since that terrible moment that Devona had flung it wide, closed softly now. The sound of its latch jerked at their attention.

Still holding her close, Tal spoke over her shoulder.

"Hello, Dale."

For an instant Devona stared straight ahead at Tal's satin lapel. An instant in which she tried to discipline the expression on her face, regiment the routed emotions fleeing now like some ragged army through her mind. When she turned, she met the strange smile on Dale's lips, heard a note of—could it be hatred—in his voice.

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

"Hello, Dale."

WHEN THEY SWITCH TO POSTUM, I HAVE TO SCRAM

P101

"Well—sounds as if congratulations were in order, Tal."

"I'll say!" Tal's face was a study in proud delight. "And what's the idea of busting in on a guy when he's right in the midst of his proposing?"

Dale managed a grin. "Sorry, old man. I had no idea you were up to that."

"Neither did I—until just now."

Tal hugged her close, smiled down at her. "May I present the future Mrs. Brasher," he said. Then laughing, he amended, "The future Mrs. Talbot Brasher, I should say."

Unfaltering, Devona met Dale's glance as it travelled from Tal's jubilant face to her own trembling smile.

"Congratulations, Tal," Dale said, but he looked at her. "And my very best wishes for your happiness."

But Dale's eyes were bafflingly masked. He only smiled carelessly at Tal burst out of the room shouting, "Abbot! Hey, there, Abbot! Open that champagne. Both bottles. We're celebrating, Abbot! Where the devil is that?"

As Tal's steps thundered down the hall, Devona and Dale faced each other across a widening chasm of silence. Finally Dale bridged it with a sarcastic:

"So it's to be — Mrs. Talbot Brasher."

Obviously he hadn't seen — he didn't understand! She wanted to sink into that chasm and pull it over her head. "Yes," she managed quietly. "Talbot needs me."

"Perhaps it was better this way. For Tal's sake, Dale had better not know about—about the gun."

"And I presume—" Dale bowed a little, "you need him too?"

"Of course." Quick loyalty to Tal, to her own promise to him, prompted her, as head high, she met Dale's challenge levelly. "I love him," she added quietly.

"I see. Isn't it rather—sudden?" She flushed, her eyes lowered, defeated for the moment before the savage assault of Dale's sarcasm.

"I—I—" she stammered helplessly, but her lips as words refused to come.

"I didn't know you had ambitions in his direction."

That stung her pride out of its muteness. "What do you mean?"

"I mean that for an ambitious little girl like yourself, I'd rather assume marriage would have to be a handsome price tag attached. And—"

"His smile was like a smart slap in the face, if you didn't know, you should be told now that the Brasher fortune is practically non-existent."

"Surprised! I don't wonder! But you see—it's this way. What the depression didn't do to us this little plunge into backing Tal's play, finished up. We're broke, my dear little future sister-in-law. So—let me be letting myself in for something—"

Fury swept a crimson flood-tide into her cheeks as Devona took a step toward him, her slim fists clenched, her words coming low and even as she lashed out at him.

"You're despicable. You're attributing to me, and to Tal, your own contemptible motives. I love Tal. I'll marry him for that reason—and for no other."

"Good!" Dale applauded dryly, leaned one elbow against the fireplace mantel with magnificent carelessness. "And let's hope you really mean that. Tal couldn't stand another blow, I suppose you realize. Or—would anything like that really concern you?"

She clutched a chair back to keep her hands from flying to his smiling, sarcastic face. "I realize it—perfectly. I shan't let him down."

"Again—good." His eyes travelled slowly from her face, down the length of her soft velvet gown, to

the points of her pretty slippers, and then back. "At that, it will be one way to advance your—career, won't it?"

So that's what he thought! Just a cheap opportunist! Devona's rage turned to dust in her throat. Distrusting her, Dale was only fighting her this way to protect Tal from what he probably believed was unscrupulous selfishness. How could she make him see that—

"Please believe me Dale. It's not my career—it's Tal's I'll work for now. You're so wrong about—"

"We shall see," Dale shrugged and then as Tal's footsteps sounded again in the hall outside, he turned to her, his face grim, his voice lowered.

"If you do let him down, if you add one iota to the agony he's just been through, by all the gods, Devona Raebourne, I'll kill you. He's the only brother I've got and I happen to care more about what happens to him than anything else. Understand that? Or can you?"

Mute, she nodded, fought back tears.

"If you don't mean it when you say you love him—" Dale's eyes blazed—"then I'm warning you to clear out while there's yet time."

"I—"

But Tal's hilarious return spared her an answer. Carrying a tray of thin-stemmed glasses and champagne in a silver ice bucket, he kicked open the door, strode triumphantly into the room.

"You play bartender, Dale," he commanded and, turning, swept Devona into his arms again. "What do you think of my bride-to-be, old man? Isn't she—" his eyes devoured her, "gorgeous?"

"Very," Dale agreed dryly, picked up the silver handled bottle opener.

"And to think I found out she loved me on just the night I needed to know it more than anything else," he added, seriously as he held her closely. Then, releasing her, he stamped across the room. "You know, Dale, that play's lousy. I know it, too. I'm not sap enough to believe in it now. But it has possibilities. I'll do another. As Devona says. A better one. By heavens, I will. And I'll make those darned critics eat every word they're rushing off to get printed right this minute. Won't I, darling?" Crossing to her again, he gave her chin a little shake, kissed the top of her nose lightly.

Smiling, she nodded. "Of course you will."

"And I'll pay you back, Dale—all your share of the estate that's gone up with this mess." Tal's face was flushed, eager.

Dale poured the bubbling champagne with a steady hand. "Forget that. It was a gamble I took with my eyes open. We lost. That's all."

"But next time we won't lose," Tal insisted. "With Devona beside me now—"

"Yes, With Devona—" Dale handed her a brimming glass—"you should really—get places."

"A toast, Dale," Tal prompted, lifting his glass. "You propose the first one."

Dale lifted his glass. "To my future sister-in-law—and may her every ambition be realized."

(To Be Continued)

Doctors are fond of prescribing walking for exercise. And more people would follow the prescription if they could only do so in a comfortable chair.

It is regarded as improper for a mother-in-law to speak to her daughter's husband among some Indian tribes.

The Caspian sea, covering 168,000 square miles, is the world's largest inland sea.

Again Proving Valuable

Bessemer Process for Making Steel Is Now Being Used

The necessities of the United States defence and the Lease-Lend programs have brought about a resuscitation of the Bessemer process for making steel which was practically rendered obsolete by the Siemens-Martin open hearth system many years ago. And it is proving extremely valuable because it operates on pig iron only, and produces steel sufficiently good for many purposes, in one-eighth the time taken by the more modern method.

Henry Bessemer was an Englishman, and invented many mechanical processes, but he owed his development of the process with which his name is identified to the interest of Napoleon III. Bessemer was set pondering the matter owing to the break down of so many guns in the Crimean war. He set about to improve the quality of artillery steel, but getting no co-operation from the British government he went to France where Napoleon gave him every assistance.

The result was the invention of the converter process of making steel, and soon the world adopted it. In 1860, steel rails cost the equivalent of \$600 a ton. Bessemer in six years brought it down to \$200. His royalties brought him in more than \$1,000,000 a year, and before he died the British government made amends by recommending Queen Victoria to make him a knight shortly before he died in London in 1898.

Since his day, however, the Bessemer process has been improved, and now there are many kinds of work for which it is useful. It is estimated that existing facilities in the United States can produce 9,600,000 tons of Bessemer steel in a year, an increase of 2,600,000 tons. There is not only a valuable saving of time, but of money as well. Best of all, it eliminates a serious "bottleneck."

It is odd that a defect of British artillery in the war against Russia in 1854, should result in helping Britain and Russia to defeat Germany in 1941.—St. Thomas Times-Journal.

GEMS OF THOUGHT

SPIRITUAL JOY

The angel said unto them, Fear not; for, behold, I bring you good tidings of great joy, which shall be to all people.—New Testament: Luke 2:10.

What happiness is, the Bible alone shows clearly and certainly, and points out the way that leads to the attainment of it.—Coleridge.

Who that has felt the loss of human peace has not gained stronger desires for spiritual joy? The aspiration after heavenly good comes even before we discover what belongs to wisdom and Love.—Mary Baker Eddy.

The strength and the happiness of a man consists in finding out, in which way God is good, and going in that way, too.—Henry Ward Beecher.

Happiness and virtue rest upon each other; the best are not only the happiest, but the happiest are usually the best.

Every heart that has beat strong and cheerfully has left a hopeful impulse behind it in the world, and bettered the tradition of mankind.—Stevenson.

Promises To Be Costly

German Economy Hard Hit By Their Invasion Of Russia

The invasion of the Soviet Union promises to be a costly affair for German economy, despite the official confidence of some Reich officials that German supplies can be increased by spoils from the captured districts. The United States Department of Commerce believes.

Not only is Germany being deprived of the raw materials, particularly food, feed and oil, which it received from Russia but the present campaign has greatly taxed European transportation facilities and oil stocks.

Despite the regimented nature of the German economic system, Berlin has recently found it necessary to introduce special control over the production of machine tools—a branch of industry in which Germany has heretofore claimed to possess superiority over its adversaries in the present war.—Washington Despatch.

"They shall not pass!" reiterated old Marshal Petain in the revised version: "We'll be going right along with them!"

Win Many Decorations

Australian Soldiers Have Been Awarded 362 During Present War

Army Minister Percy Spender announced that Australian soldiers in the present war have won 362 decorations.

They include one Victoria Cross, one Commander of the Bath, nine Commanders of the British Empire, 17 Distinguished Service Orders, 40 Military Crosses, 17 Distinguished Conduct Medals, 85 Military Medals.

Recalling The Crimea

A Spot On The Map That Is Rich In British Traditions

"Crimea cut off by Nazi forces, London, March 18." So runs a headline, and that eastern battle front by the same token suddenly grows more vivid. Crimea is a place name rich with associations for all English-speaking men. But Crimea—that sounds different. Our tribal kindred fought over all the Crimea less than a century ago, and they fought at the very noon of Victoria's day, one of the two great ages for men who speak English. The tight little tale then was literally over-populated with great thinkers, great doers and, above all, great artists of the pen.

The Crimea—why, we still wear Lord Raglan's overcoat, invented for that campaign by the showoff general, and Florence Nightingale lives forever. Then there's "The Song of the Camp," which no one seems to remember by its title, but which everybody recalls when some singer starts off: "Give us a song, the soldiers cried!"

"The Charge of the Light Brigade"—well, the kiddies at school recited that for a full half century on Friday afternoons. And one great match of "deathless song" sired another—by Kipling in one of his sombre and terrible moods—"The Last of the Light Brigade," in which the old color sergeant 40 years after says that Tennyson was almost right about the "mouth of hell," as "we are all night unto the workhouse."

There was a poet who knew that peace hath her horrors, although less renowned than those of war.—Chicago Daily News.

There is more than one "United States" in the world. Others are the United States of Mexico, United States of Colombia and the United States of Brazil.

In 1900 only one woman out of 2,000 wore silk stockings.

A fool may start a strike, but it takes a wise man to stop it.

WELSH - DANYLUK

Saturday evening, October 4, Vera Danyluk and George Hugh Welsh, both of Coleman, were united in marriage at the United church manse. The official witnesses were Lily Groat and John Keresing, both of Coleman.

FONTANA - ROGERS

A wedding of much local interest was solemnized at the United church manse, Coleman at 5 p.m., October 5, when Emma, the only daughter of Mr. and Mrs. Jonathan Rogers, of Coleman, was united in marriage with Elveno Anthony, son of Mr. and Mrs. Peter Fontana, of Coleman. The bride was gown in soldier's blue with navy blue accessories and wore a corsage of white roses. Miss Agnes Kinnear attended the bride and was gown in a rose color with navy blue accessories and wore a corsage of tallianum roses. Elmo Fontana, a brother of the groom, was best man. The parents of both the bride and groom were present for the wedding service at the manse, and Rev. J. E. Kirk was the officiating minister. Immediately following the service the wedding party motored to Blairmore to pay a visit to the photographers.

At the home of the bride a very delicious and sumptuous wedding dinner was served at 6.30 p.m. A large number of the bride's and groom's immediate relatives, and a few friends, sat down to the wedding feast. An interesting phase of the happy gathering was the fact that both the grand-parents of the bride, Mr. and Mrs. Dave Gillespie and Mr. and Mrs. J. S. Rogers were present and enjoyed to the full the gathering. In a few

well chosen words, Mr. Dave Gillespie, the grandfather, proposed the toast to the bride, and the groom made fitting response.

In the evening a few more friends gathered at the home and a very pleasant evening, till the wee sma' hours, was spent in singing dancing, and a jovial good time.

The happy young couple will reside at Second Street west, and the best wishes of the whole community go out to these young folk, representatives of two well-known and highly respected families, who have resided many years in Coleman.

POLISH SOLDIER'S LAMENT

Ah've been living up in Glesca, and they taught me English guid and weel,

They said Ah wis a smart wee chap—an unco clever chiel; And they bade me aye tae wear a smile; tae aye be bricht and cheery,

And no' tae get doon i' the dumps when things went tapsalterie. They taught me English, did they Glesca folk, but noo Ah'll end up in the madhouse or the jile!

Since Ah ha'e gane tae England—whit dae they talk doon here? The coofs! They canna talk at a', and Ah'm feeling unco sad, Nae English spoke in England!

Faith! the problem's got me mad; Ah try tae mind my Scottish freens, and wear a wee bit smile, But Ah'm feared that noo Ah'll end up in the madhouse or the jile!

Oh! Hoo I sigh for Glesca toon and the talk o' Glesca men.

Tae hear guid English spoken in the brauest wey Ah ken!

—D. H. Glasgow.
